

Call for applications for new positions in the EANO Guideline Committee 2026-2028

Dear EANO Members,

EANO is THE Association for Neuro-Oncology in Europe and has launched several committees where your support and input as experts in the field of Neuro-Oncology is highly appreciated.

The Guidelines Committee concentrates its activities on discovering the need per topic and timing, as well as responding to Executive Board requests for new or updated guidelines with a focus on interprofessional/interdisciplinary/international guidelines on relevant topics in Neuro-Oncology. If no outside author is appointed, the task is also to prepare and draft guidelines and support the Executive Board in the political process of guideline development for EANO alone or in conjunction with other organizations.

EANO is looking for active new members who will start their engagement after the EANO Meeting in Rome 2026. The Guideline Committee is composed of representatives from different subspecialties with a balance regarding European countries and gender. The duration of the position is 2 years, with the possibility of one re-election, depending on the input of the member.

Applicants must be members of EANO (i.e. paid-up members) with residency in a European country.

Applications for the Executive Board at the same time are not possible; applications for another EANO Committee are possible by indicating primary and secondary choices, also former Executive Board members are very welcome to apply!

The election procedure will be as follows:

1. Interested candidates should apply via EventsAir with a letter of motivation and CV. The deadline for submission is **May 28, 2026**.
2. The Guideline Committee and EANO Executive Board will review all the applications by mid-July, taking into account the CVs, geographic representation, and speciality to ensure the Disparity Committee has a broad representation.

3. At the General Assembly during the EANO Meeting in Rome, the approved candidates will be presented.

Yours sincerely,

Emilie Le Rhun

Chair EANO Guideline Committee, Co-Opted Member of the EANO Board
